Additional information on the Friends and Family Test

Sample patient questionnaire

### Frequency and distribution of ratings for the Friends and Family Test question

## How likely are you to recommend our GP practice to friends and family if they needed similar care or treatment?

Table 1

| Criteria category for scoring    | Response scale              | Number of responses | Percentage of responses* |
|----------------------------------|-----------------------------|---------------------|--------------------------|
| Promoters                        | Extremely likely            | 24                  | 51%                      |
| Passive                          | Likely                      | 15                  | 32%                      |
|                                  | Neither likely nor unlikely | 4                   | 9%                       |
| Detractors                       | Unlikely                    | 3                   | 6%                       |
|                                  | Extremely unlikely          | 0                   | 0%                       |
|                                  | Don't know                  | 1                   | 2%                       |
| Total responses to this question |                             | 47                  | 100%                     |

\* May not add up to 100% due to rounding

| Number of patients who left Q1 blank (but provided other feedback on the questionnaire) | 1  |
|---|----|
| Total number of patients providing feedback   | 48 |

#### Graph 1

# 83% of patients who responded to the survey would be either extremely likely or likely to recommend your practice to friends and family if they needed similar care or treatment.

The sum of the 'Extremely likely' and 'Likely' percentage of responses in Table 1 may not equal the percentage in the grey box above due to rounding.

## Of those 47 patients who answered the Friends and Family Test question, 45 (96%), filled out a paper questionnaire and 2 (4%), completed a questionnaire online.

### Cumulative and previous survey information

### Table 2

|                      |                             |  |                     | Frequ  | ency and di                       | stribution | of ratings            |               |
|----------------------|-----------------------------|--|---------------------|--------|-----------------------------------|------------|-----------------------|---------------|
|                      | Total<br>responses to<br>Q1 | Percentage of patients<br>extremely likely or likely<br>to recommend | Extremely<br>likely | Likely | Neither<br>likely nor<br>unlikely | Unlikely   | Extremely<br>unlikely | Don't<br>know |
| Cumulative feedback* | 141                         | 85%  | 68                  | 52     | 11                                | 6          | 1                     | 3             |

\*This cumulative feedback is based on the sum of the previous months survey data, as below (up to a maximum of 12 months).

| Feb-15 | 47 | 83% | 24 | 15 | 4 | 3 | 0 | 1 |
|--------|----|-----|----|----|---|---|---|---|
| Jan-15 | 42 | 76% | 20 | 12 | 5 | 3 | 0 | 2 |
| Dec-14 | 52 | 94% | 24 | 25 | 2 | 0 | 1 | 0 |

### Patient comments

The following comments are from patients who indicated that they were happy for these to be made public.

All comments are included in their entirety but all attempts have been made to remove details which could identify specific patients or practitioners.

### Please tell us why you answered as you did in question 1:

- · Brilliant GPs, nurses and staff, very well organised.
- Mental heath issues are slow to be recognised fully and appropriate treatment slow in being given. Referrals from
  outside parties are slow to progress through your system. Doctor referral letters can be slow in being produced by
  yourselves. Some staff on reception can be very negative and difficult.
- Staff friendly. Doctors helpful. Only negative is partner works and doesn't get in until 6:45 including Saturdays, struggles to get appointment on his day off.
- Very good service from reception/nurses/doctors, thank you.
- It is rare I can ever get an appointment, when I can I am waiting as they are constantly late. So they try and rush you when you do see the doctors. I visited a nurse for something else and thought I would tell them about the pain in my side which they dismissed. I later went to hospital with appendix.
- Extremely good service.
- Extra care and attention and very helpful.
- Waiting time can be long, but doctors/nurses are polite and sufficient.
- The surgery is under pressure of numbers, but they will always seek to accommodate.
- Difficulty in getting an appointment.
- Always polite and friendly on the phone and helpful doctors very thorough, so don't mind waiting if they overrun.
- Already satisfied.
- Because it's a good surgery and good doctors I've used it for years.
- The GPs were very helpful, however the appointments are always running very, very late.
- Waiting times.
- Seen quite quickly, but sometimes doesn't do proper tests.
- Friendly staff. Good doctors. Only problem is getting an appointment as I work late.
- Pleased with way I am treated.
- Always manage to see a doctor.
- Because you are good with my children, get the best care always.

### Friends and Family Test Report: February 2015

Please tell us why you answered as you did in question 1:

- Because their appointments for emergencies are very quick.
- Waiting times.
- Always had good, friendly service.
- Very good practice.
- Great staff.
- GPs really understanding and helpful.
- Extremely friendly and helpful.
- Very friendly and helpful.
- I have no family here.
- Always been satisfied with the doctors for many years.
- Great.
- Fabulous.
- Go out of the way to help you.
- I have been a patient to this surgery for over 20 years.
- I'm happy with care I receive here.
- Excellent reception staff.

### Demographics

### Q3: Gender

|        | Number of responses | Percentage of<br>responses* |
|--------|---------------------|-----------------------------|
| Male   | 21                  | 44%                         |
| Female | 26                  | 54%                         |
| Blank  | 1                   | 2%                          |

\* May not add up to 100% due to rounding

### Q4: Age

|         | Number of<br>responses | Percentage of<br>responses* |
|---------|------------------------|-----------------------------|
| 0 - 15  | 1                      | 2%                          |
| 16 - 24 | 5                      | 10%                         |
| 25 - 34 | 4                      | 8%                          |
| 35 - 44 | 7                      | 15%                         |
| 45 - 54 | 12                     | 25%                         |
| 55 - 64 | 6                      | 13%                         |
| 65 - 74 | 7                      | 15%                         |
| 75 - 84 | 5                      | 10%                         |
| 85+     | 1                      | 2%                          |
| Blank   | 0                      | 0%                          |

\* May not add up to 100% due to rounding

### **Q5: Ethnic group**

|   | Number of responses | Percentage of<br>responses* |
|---|---------------------|-----------------------------|
| White                                     | 40                  | 83%                         |
| Mixed/Multiple ethnic groups              | 0                   | 0%                          |
| Asian/Asian British                       | 3                   | 6%                          |
| Black/African/Caribbean/<br>Black British | 3                   | 6%                          |
| Other ethnic group                        | 2                   | 4%                          |
| Blank                                     | 0                   | 0%                          |

\* May not add up to 100% due to rounding

### Q6: Day-to-day activities limited because of health?

|                       | Number of responses | Percentage of<br>responses* |
|-----------------------|---------------------|-----------------------------|
| Yes, limited a lot    | 12                  | 25%                         |
| Yes, limited a little | 9                   | 19%                         |
| No                    | 24                  | 50%                         |
| Prefer not say        | 2                   | 4%                          |
| Blank                 | 1                   | 2%                          |

\* May not add up to 100% due to rounding

Supporting documents

Additional information on the Friends and Family Test

The Friends and Family Test (FFT) is a feedback tool that supports the fundamental principle that people who use NHS services should have the opportunity to provide feedback on their experience that can be used to improve services. It is not a traditional survey. It is a continuous feedback loop between patients and practices.

Practices can use the feedback gathered through the FFT to celebrate successes and to support staff to make improvements where the experience of service does not live up to expectations. FFT results are also one useful source of information which can help to inform choice for patients and the public.

More information and guidance about the use of the FFT in the NHS can be found at <u>http://offlinehbpl.hbpl.co.uk/NewsAttachments/PGH/FFT.pdf</u> and <u>http://www.england.nhs.uk/wp-content/uploads/2014/07/fft-imp-guid-14.pdf</u>.
